DETAILED ACTION

1. This action is in response to applicant's amendment received on 2/26/01.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 21 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In page 3, line 2, the term "coliso".

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 11-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 1 recites the limitation "said surface" on page 2, line 1. There is insufficient antecedent basis for this limitation in the claim.

7. Claim 20, it is not clear what "centering guide slot" encompass. There is no support in the specification. Also there is no support in the specification about the term butt.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 11, 13-14, 16, 18-19, 20 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Herd.

Herd discloses (Fig. 3-4) the invention including a cutting die support cylinder 3, a cutting die 20, a fixing means, a bolt 46 with head, a working device/dynamic fluid cylinder 38 within a hollow body, a surface 40, a pneumatic or hydraulic cylinder (see col.4, line 29-30), a plurality of threaded holes, a circumferential butt 48, an axial butt and a centering guide slot (see fig. 3, the area that connect the screw 49) and spring 41.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Herd in view of J. F. Smith.

Herd discloses the invention substantially as claimed except for a bolt having a head with a larger area. However, Smith teaches the use of a bolt 7 having a head with a larger area 13 for the purpose of fixing the blade. It would have been obvious to one

of ordinary skill in the art at the time the invention was made to have modified Herd's bolt by providing the bolt as taught by Smith in order to reduce the possibility of loosening by vibration.

12. Claims 15 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over herd in view of J, F. Smith.

Herd discloses the invention substantially as claimed except for a quincunx form. However, the examiner takes official notice that the use of the quincunxes forms old and well known in the art for the purpose of holding to pieces. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Herd's device by providing the quincunxes from in order to obtain better holding configuration for the die.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. J. F. Smith, Quinlan and Meeks are cited to show related device.

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
